Protein kinase **100**, 97
Protein kinase-A **100**, 115
Protein kinase C **100**, 89
Protein stability **100**, 369, 387
Purple membrane **100**, 397

Quantitative genetics **100**, 309
Quantum computation **100**, 31
Quantum theory **100**, 31

Rat cerebellar granule cells **100**, 287
Rat hippocampal neurons. **100**, 271
Rat hippocampal slice **100**, 203
Receptor function **100**, 239
Receptors, glutamate, *N*-methyl-D-aspartate, non-*N*-methyl-D-aspartate **100**, 65

Recombinant receptor **100**, 225
Release **100**, 59
Respiratory burst **100**, 121

Second messengers **100**, 121
Sensitivity **100**, 97
sensitivity to diethylether anesthesia **100**, 329
Single genetic modification **100**, 301
Single potassium channels **100**, 287
Sodium channels **100**, 247
Spinach chloroplast **100**, 135
Spinal cord **100**, 41, 51
Stereoselectivity **100**, 1
Structural aspects **100**, 193
Structural requirements **100**, 209
ϵ-Subunit **100**, 233
Supporting membrane lipids **100**, 447
Suppress **100**, 255
Surge current **100**, 225
Sympathetic neurons **100**, 97
Synapse **100**, 41
Synaptic transmission **100**, 59
Synthetic peptide **100**, 369

TEA^+ **100**, 277
Temperature **100**, 353
Tetracaine **100**, 441
Thermodynamic activity **100**, 353
Thiopentone **100**, 85
TOK1 **100**, 293

Uptake **100**, 59

Volatile anaesthetic **100**, 41
Volatile anesthetic **100**, 293
Volatile anesthetics **100**, 135, 225, 239, 255, 287, 309, 387, 405
Volatile convulsant **100**, 225

Water–membrane interface **100**, 421
Water–oil interface **100**, 421

Xenopus oocyte **100**, 319
Xenopus oocytes **100**, 233
X-ray diffraction **100**, 397
